

Simple and straightforward!

Everything is done to meet your requirements and to ensure the effective destruction of your data.

- 1** Give us a call to determine the type and size of container that is best for you (we have a wide range of bins, bags and cabinets to choose from).
- 2** Again with our help, agree on the level of service required; opt for scheduled collections or our 'call and shred' service.
- 3** We deliver your chosen secure containers.
- 4** You fill them.
- 5** As and when required, our secure shredding vehicle visits your premises, our security vetted personnel collect the confidential material, load it into the vehicle's shredders and destroy it on your premises. You are more than welcome to watch.
- 6** We provide you with a Certificate of Destruction as proof that your materials have been securely destroyed.
- 7** We return the shredded materials to our facilities for recycling.

And that's all there is to it!

Quick, easy and convenient!

Off-site expertise On-site convenience

Tailored service

Regardless of which area of the economy you operate in, or how large or small your organisation, MobileShred guarantees a solution that is tailored to your needs. Government departments, health authorities, major financial institutions, legal firms and commercial organisations have all benefited from the high levels of integrity and discretion that we deliver.

Our services encompass the secure collection and destruction of all types of documents and electronic storage media, followed by environmentally responsible recycling or disposal.

From start to finish you are assured of a professional approach, including expert advice on the most appropriate service for you, scheduling of visits to your requirements, and final certificates of destruction to give you total assurance that the process has been completed. Plus, with shredding taking place at your premises, you have the option to witness the entire destruction process.

Highest standards...

... in security

Accredited under the stringent requirements of the United Kingdom Security Shredding Association code of practice and meeting the requirements of BS EN 15713, our destruction services facilitate compliance with the Data Protection Act and give you total confidence that your data will be destroyed in the most secure conditions.

Your peace of mind is further guaranteed by the fact that our operations are certified to ISO 9001 and all our staff are security-vetted to the requirements of BS 7858. All operatives will arrive in uniform and carry photographic proof of their identity.

... in environmental responsibility

After destruction, all paper based material is returned to our own fibre recovery facilities, based at Gateshead and Durham, where it is processed, ready for recycling into tissue products. In the majority of cases this is undertaken by local mills to reduce environmental impact of excessive transportation.

We aim to recycle or dispose of non-paper waste in the most environmentally responsible fashion possible.
